

Rooftop photovoltaic panels installed

Can solar panels be installed on a roof?

This is done by replacing a section of your roof's materials with solar panels. As a result, installing in-roofsolar panels is a great option if you're adding them to a building under construction or if you're replacing an old roof.

Are in-roof solar panels a complete roofing solution?

Although sometimes mistakenly referred to as solar roof tiles, integrated solar panels are not designed to look like tiles or slates, so they aren't generally a complete roofing solution. So, when installing in-roof solar panels, you'll still need to account for other materials in your planning and calculations of in-roof solar panels costs.

Are in-roof solar panels a good idea?

While to some people regular solar panels can be unappealing, an in-roof solar system is a great solution if you want to prioritise your home's design. Lightweight: Unlike a traditional solar panel, which weighs around 18 - 24kg, putting some strain on your roof, integrated solar panels weigh about 10 - 20kg per panel.

Can solar panels be mounted on a flat roof?

For solar panels on a flat roof, mounting systems are slightly different and can include a triangle 'ballast' box to support the panels. For solar thermal panels (with cells that use the sun's heat to warm water in a house) things are a little different.

How do I install roof-integrated solar panel roof tiles?

Roof-integrated solar panel installation is a simple process with Marley SolarTile®; - just secure the fixings, place the first tile, push-fit additional tiles and then attach final fixings and flashings.

How much do in-roof solar panels cost in the UK?

If you're considering installing in-roof solar panels, you'll want to know how much solar panels in the UK cost. For an average 2 - 3 bedroom household, integrated solar panels cost somewhere between £5,000 - £6,000. As you can see, installing solar panels isn't cheap. Thankfully, there are several solar panel grants available in the UK.
