

Why are 43% of Dutch households unable to install solar panels?

Although they may want to power their homes with clean energy, more than 43% of Dutch households can't install solar panels because they live in apartments, don't own the building or have too much shade on their rooftop. WeShareSolar is working to ensure everyone in The Netherlands has access to solar power, even if they don't have a roof.

Is rooftop solar financing still a challenge?

Financing continues to be a challenge, especially for smaller consumers or those with lower credit credentials. Also, a large portion of the credit facility for rooftop solar lies undeployed with the banks. A credit guarantee scheme should be created to mitigate risk for customers with lower credit rating.

Does wesharesolar sell out new solar projects?

WeShareSolar now sells out new solar projects within hours. Solar projects used to have a financing gap, with normal projects ranging from EUR50,000 to EUR500,000. This figure is too small to qualify for project financing at a bank, yet it is too large for a project owner to invest on their own because the internal rate of return isn't high enough.

How many solar panels has wesharesolar financed?

So far, WeShareSolar has enabled 20 projects and the installation of 15,000 solar panels, thanks to investments from thousands of crowdfunders. WeShareSolar has crowdfunded EUR3.0 million. Banks now finance along with the crowdfunders to leverage the impact a crowdfunded euro has.
