

Rooya solar energy system Hungary

Why is solar power growing in Hungary?

Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2022 Hungary had just over 4,000 megawatt (MW) of photovoltaics capacity, a massive increase from a decade prior. Relatedly, solar power produced 12.5% of the country's electricity in 2022, up from less than 0.1% in 2010.

What is Hungary's largest solar energy project?

Hungary's largest solar energy project is underway, in collaboration with Huawei. The contract was signed in February, with MAVIR Ltd. as the investor.

What is Hungary's largest energy storage facility?

Hungary's largest energy storage facility is currently under construction near Szolnok, with Chinese company Huawei involved in the solar energy project. The contract was signed in February, with MAVIR Ltd. as the investor. According to portfolio.hu, the project is estimated to cost HUF 8.5 billion (EUR 21 million), with a capacity of 60 MWh.

Solar power in Hungary has been rapidly advancing due to government support and declining system prices. By the end of 2023 Hungary had just over 5.8 GW of photovoltaics capacity, a massive increase from a decade prior. Relatedly, solar power accounted for 18.4% of the country's electricity generation in 2023, up from less than 0.1% in 2010.

Hungary's investment in energy infrastructure has to date been one of the lowest in the EU in the last decade. However, in 2023 the European Commission approved a EUR1.1bn scheme from the Hungarian government to support large-scale energy storage projects. These particular grants will take the form of an investment grant during the construction phase and a two-way contract for ...
