

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan Sénégal Émergent(PSE), or the Emerging Senegal Plan.

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

Can Senegal use natural gas to generate electricity?

Senegal has major ambitions to use domestic gas resources to generate electricity through its "gas-to-power" strategy decided in 2018, which aims to reduce national energy dependence on oil and coal by incentivising investment in natural gas as a transitory fuel in the energy transition.

How has Senegal reformed its energy sector?

Since the launch of the Plan Sénégal Émergent, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

What is Senegal's energy strategy?

Senegal's energy strategy is to divert the HFO-rich energy mix away from only fossil fuels and towards gas and renewables. Senegal has yet to develop its gas industry and related infrastructure.

Who are the independent power producers in Senegal?

Independent power producers (IPPs) play an important role in Senegal's energy sector. They include operator companies such as Senergy, Contour Global and Melec PowerGen, which own and operate solar, wind and hydroelectric power plants.

RPS Energy is primarily focused on large-scale energy storage project development, and in some jurisdictions, development of medium scale solar photovoltaic projects. The team at RPS is uniquely positioned to navigate the technical, financial, and regulatory environment inherent to project development in New England. ...

ERS is a Senegalese energy developer and producer specializing in energy production. Launched in 2013, ERS is today 51% owned by a Senegalese entrepreneur, Moustapha Sene and 49% by SENELEC SA ("Senelec", a state-owned utility in Senegal), after Senelec entered ERS capital in ...
