

Rural solar power subsidy routine

What is the rural energy for America Program (REAP)?

With the passage of the Inflation Reduction Act, the Rural Energy for America Program (REAP) has been provided over \$2 billion for renewable energy systems and energy efficiency improvement grants for agricultural producers and rural small business owners through 2031.

How much is the rural energy for America program worth?

The U.S. Rural Energy for America Program (REAP) has quadrupled to more than \$2 billion as part of the Inflation Reduction Act.

What is the USDA Rural Energy pilot program?

These funds will be targeted to help people who live in communities that have been historically underinvested and disinvested. USDA is making the funds available through the new Rural Energy Pilot Program to help the people of rural America build back better, stronger and more equitably than ever before.

How many GW of solar energy will a low-income community get?

Programs funded by Solar for All will deploy and unlock over 4 gigawatts (GW) of distributed solar energy entirely for low-income and disadvantaged communities. According to analysis from the U.S. Department of Energy, by the end of 2023, low-income households were benefiting from approximately 7 GW of solar energy.

How will EPA's 60 solar for all program help low-income households?

EPA estimates that the 60 Solar for All recipients will enable over 900,000 households in low-income and disadvantaged communities to deploy and benefit from distributed solar energy. This \$7 billion investment will generate over \$350 million in annual savings on electric bills for overburdened households.

What does Biden-Harris' energy policy mean for rural communities?

"The Biden-Harris Administration's commitment to cleaner energy provides rural communities with an affordable and reliable power grid, while supporting thousands of new jobs and helping lower energy costs in the future," Agriculture Secretary Tom Vilsack said.

Going solar helps lock in energy costs by taking control of the source of the power. In some cases, the farm or business can turn the solar energy it produces into revenue by selling power back to the local energy provider. [Learn more ...](#)
