Did Russia use an intercontinental ballistic missile for the first time?

The foreign ministry in Kyiv says Ukraine believes Russia has used an intercontinental ballistic missile (ICBM) for the first time in the war, but is still waiting for "experts" to confirm this.

Did Russia use an ICBM in a Russian missile strike?

The Ukrainian Air Force claimed that Russia's assault on the city included its first use during the war of an intercontinental ballistic missile, though a Western official told CBS News on Thursday that an ICBM was not used in the strike. Firefighters work at the site of a Russian missile strike in Dnipro, Ukraine, Nov. 21, 2024.

Did Russia fire an ICBM at Ukraine?

US officials who have been speaking to US media seem to agree on one thing: that Russia did not fire an intercontinental ballistic missile (ICBM) at Ukraine, but it is still unclear exactly what type of ballistic missile was used. An unnamed US official tells the BBC that it was an "experimental" medium-range ballistic missile.

Was Ukrainian plant hit by an intercontinental ballistic missile?

Hours after Thursday's strike touched off a debate over whether the Ukrainian plant was hit by an intercontinental ballistic missile, President Vladimir Putin made a rare and surprise appearance on Russian television to clear up the mystery.

Could Russia use a new intermediate-range missile in a strike on Ukraine?

Russian President Vladimir Putin says Moscow has tested a new intermediate-range missile in a strike on Ukraine and that it could use the weapon against countries that have allowed Kyiv to use their missiles to strike Russia. (AP Production: Tracy Brown)

Are Russian missiles intercepted by Ukraine?

Some 80% of the missiles fired by Russia have been intercepted by Ukraine, an extraordinary figure. But these faster speeds of ballistic missiles are intended to try to bring that percentage down. Steve Rosenberg: After days of escalation, what will Putin do next?
