

What is the energy sector in Rwanda?

The energy sector in Rwanda is made up of three sub-sectors: power, hydrocarbon and new and renewable sources of energy. Amongst the renewable sources of energy are biomass, solar, peat, wind, geothermal and hydropower. Biomass is the most used and dominates both the demand and supply sides of the Rwandan economy.

Where can I find information on energy in Rwanda?

For more information on energy in Rwanda, please visit the websites of the Rwanda Ministry of Infrastructure, RDB, the Rwanda Utilities Regulatory Authority, and the Rwanda Energy Group. They provide information on electricity access, both on-grid and off-grid, including solar home systems and mini-grids.

Is there a biogas support programme in Rwanda?

Report on the Feasibility Study for a Biogas Support Programme in the Republic of Rwanda. SNV and Ministry of Infrastructure (MININFRA), Kigali. EAESI (2005). Rwanda National Paper. Presented at the Forum of Energy Ministers for Africa (FEMA), East African Energy Scale Up Initiative (EAESI). Nairobi 24-2 June 2005.

What is the Rwanda cooling initiative?

The Rwanda Cooling Initiative aims to transition the market to environmentally friendly and energy efficient cooling technologies. BASE is participating in the project in partnership with the United Nations Environmental Program (UNEP) and with support of United for Efficiency (U4E).

Is Rwanda facing an energy crisis?

Several indicators point to an energy crisis in Rwanda including: accelerated deforestation, a biomass energy deficit and deterioration in electricity generation and distribution systems. The major part of the energy consumed in Rwanda today still comes from wood (80.4 per cent).

Can a friendly regulatory environment speed-track solar adoption in Rwanda?

A friendly regulatory environment deserves credit for helping to fast-track the adoption of solar, according to local analysts. Rwanda is rich in renewable energy resources, but the cost of capital and the low price of electricity from the grid are slowing down development.
