Sacred Sun focuses on optimizing the power density of 12V series high-power lead-acid batteries, while also tackling the problem of product warranty period and consistency of use within the service life, so that the products can better meet the requirements of intelligent computing data centers.

Let's review Sacred Sun battery technology road map. VRLA BATTERY. Sacred Sun VRLA batteries use the latest innovations, high purity raw materials and many patented technologies that ensure high quality and excellent performance with +99% gas recombination efficiency. All batteries are sealed, non-spillable and maintenance free.

Sacred Sun FHL series battery, with its excellent cycle performance and fast charging performance, is the ideal choice for unstable power supply systems. Its innovational structural design has achieved the horizontal placement of plates, and therefore enables the batteries to be applied in more complicated working conditions.

High Voltage (HV) lithium-iron modules are cobalt-free, extremely safe and high-performing, and a very cost-effective HV battery to build and deliver flexible systems and scalable solutions. 76.8V HV Series use "best-in-class" Lithium Iron Phosphate (LFP) chemistry for the highest level of safety, thermal stability, and reliability.
