Sagemcom proposes optimised power stations for isolated off-grid sites and on-grid sites to ensure high quality of services for Telecom sites. Thanks to renewable energy sources, this solution reduces the use of diesel generators, ...

Sagemcom collaborates with its customers in the public and private sectors to supply and operate metering, energy infrastructure and smart grid solutions. Today, communication technologies form an integral part of gas metering and they have enabled smart meters to become a reality. The goal consists of facilitating remote meter readings.

Sagemcom proposes optimised power stations for isolated off-grid sites and on-grid sites to ensure high quality of services for Telecom sites. Thanks to renewable energy sources, this solution reduces the use of diesel generators, the corresponding operating costs (consumption of fuel) and the carbon footprint.

Sagemcom has been supporting the deployments and the development of energy distribution utilities and grid controllers for more than 25 years, by offering them end-to-end products and solutions. Sagemcom develops metering products, and, since 2006, has been investing heavily in smart grid solutions, in which Sagemcom is one of the leaders in ...
