

Saint Lucia tripol sistem energy

What are Saint Lucia's energy goals?

In 2014, the Government of Saint Lucia announced refined energy targets, setting a renewable energy penetration target of 35 per cent and an energy efficiency target of 20 per cent reduction in consumption in the public sector, both to be achieved by 2020.

What is the future of electricity in Saint Lucia?

At the same time, recent developments in energy efficiency, renewable energy, cleaner-burning fuels (e.g., natural gas), electricity storage, and advanced controls and metering present a myriad of opportunities. Saint Lucia's current electricity system is well managed, reliable, and equitable.

What is Saint Lucia's energy transition opportunity?

RESULTS Saint Lucia's energy transition opportunity provides a win-win situation in which the Government of Saint Lucia supports constituents through cheaper electricity, and LUCELEC continues to profit and provide reliable service.

How can wind turbines improve the energy system in Saint Lucia?

In addition to energy storage systems, demand response and frequency support from wind turbines can also be used to maintain system stability in the presence of high renewable generation. The two studies completed on the Saint Lucia electricity system are described in more detail below.

When did Saint Lucia start regulating electricity?

In 2010, Saint Lucia began a process to revise the electricity regulatory framework (last updated in 2006), including the concessionary agreement, in line with national objectives to increase the use of renewable energy. In early 2016, a new independent National Utilities Regulatory Commission (NURC) was established.

Why is LUCELEC a reliable electricity service for Saint Lucia?

For over 50 years, LUCELEC has provided a reliable and efficient electricity service for Saint Lucia. The Government of Saint Lucia recognizes that a successful evolution of the electricity sector could not happen without the collaboration and expertise of LUCELEC.
