The New York Microgrid Project, Orange and Rockland Utilities, Inc. is currently in the planning stage and will use smart grid technology. The project has a rated capacity of 17MW. The smart grid project is owned by Orange and Rockland Utilities.

Smart grid technologies promote the modernization of the electric grid, including the use of renewable and

distributed energy resources, fewer greenhouse gas emissions, and lower operating costs. With a smart grid, New Yorkers will have access to a more affordable electricity and a more resilient and reliable energy system.

The New York Microgrid Project, Orange and Rockland Utilities, Inc. is currently in the planning stage and will use smart grid technology. The project has a rated capacity of ...

The New York State Smart Grid Consortium names David J. Manning as the organization's first executive director. "For our short history, the Consortium can be proud of key accomplishments. The appointment of an executive director marks a new milestone in our growth," said Bob Catell, Chairman, NYS Smart Grid Consortium.

The Smart Grid Vision for New York State is to facilitate a comprehensive, coordinated and collaborative approach to ensure the most efficient, effective, and secure implementation that meets the energy needs of the citizens, businesses and other consumers in New York. The Smart Grid will be built upon three key components,

Technical Smart Grid Plan - New York's Technical Plan is "to create a fully visible, integrated "smart" electricity system". Cyber security and standards compliance are key foundation elements. As outlined below, the Technical Plan describes what the smart grid will deliver in clear terms along five key dimensions.

BUFFALO, N.Y. (WIVB) - In just a matter of weeks, many National Grid customers will start getting new smart meters installed at their homes or businesses. Officials with the utility company a...
