Thin Film. This type of panel is made up of very thin structures that can be set up on roof tiles, glass, and masonry. Their thinness makes them light and the fact that they are made of amorphous silicon, cadmium telluride, and/or gallium gives them flexibility, also. This option is, most of the time, chosen for aesthetic purposes and large-scale projects, due to its ...

Right now, I'm trying to understand which wires to put where. For example, do I put the solar generator in the garage and run a connection from the inverter through the wall of my garage into the house. Or do I instead keep the generator in the house and run the wires from the solar panels through the wall and into the house.
