

Does Saudi Arabia have solar energy?

There is a growing interest in utilization of solar energy in Saudi Arabia as the country is blessed with abundant solar flux throughout the year. Saudi Arabia has one of the highest solar irradiation in the world, estimated at approximately 2,200 thermal kWh of solar radiation per square meter.

Why is Saudi Arabia investing in solar energy?

Leveraging its abundant sunshine and vast desert areas, Saudi Arabia is now pivoting to solar energy, aligning with its Vision 2030 plan to diversify its economy and ensure sustainable growth by reducing oil dependency and investing in renewable energy.

Which solar energy projects are completed in Saudi Arabia by 2030?

The Lunch of Saudi Solar Energy Program Sakaka, Al Shuaibah, and Sudair Solar Energy Projects have been completed. By 2030, the goal is 40GW PV solar and 2.7GW (CSP) concentrated solar power capacity.

Is solar energy enhancing social equity in Saudi Arabia?

Social Equity: The move towards solar energy is significantly enhancing social equity in Saudi Arabia. By generating new job opportunities within the solar energy sector and emphasizing skill development and social mobility, the initiative is making strides in ensuring that the benefits of renewable energy reach all corners of society.

Why is Saudi Arabia moving towards solar energy?

This move towards solar energy in Saudi Arabia is driven by a desire to reduce oil dependency, enhance economic stability amidst oil price fluctuations, and address environmental concerns by cutting carbon emissions, as highlighted by the Office of Energy Efficiency & Renewable Energy.

Can Saudi Arabia become a solar power exporter?

Keeping in view its regional dominance, Saudi Arabia can play a vital role in the popularization of solar energy in the MENA region. Solar energy program may not only augment oil-wealth of the Kingdom, but also transform Saudi Arabia into a net solar power exporter in the near future. Loading...

Saudi Arabia aims to produce 75% of renewable energy components locally by 2030 as the Kingdom chases the target of attaining carbon neutrality by 2060. In this direction, China's TCL Zhonghuan will build a 20 GW ingot and wafer manufacturing project here, while JinkoSolar has committed to building a solar cell and module factory with 10 GW ...
