

# Saudi Arabia smart energy alliance

Will Saudi Arabia's smart grid meet the national electricity needs?

Considering the specifications of the Saudi Arabian national grid, three key aspects are considered for the realization of the smart grid to meet the national electricity needs: 1. Renewable Energy: the smart grid energy system should enable the KSA's renewable targets and allow flexibility to deploy such technologies in the grid network. 2.

Why does Saudi Arabia have a high energy consumption?

Saudi Arabia's elevated per capita energy consumption, considerable electricity generation, expanding energy production and authorized power capacity, governmental backing for energy efficiency campaigns, and considerable prospective benefits from renovating structures underscore its endeavors and obstacles in the energy domain. 1.

How is Saudi Arabia developing its solar energy sector?

1. Saudi Arabia has initiated the National Renewable Energy Program (NREP) to develop its solar energy sector, with several projects in progress, including a 600 MW capacity project. 2. Large-scale project such as Sakaka solar Independent Power Producer (IPP) (300 MW) and Dumat Al Jandal wind project (400 MW) were part of the first bidding process.

Why is Saudi Arabia transitioning to independent power and water projects?

Saudi Arabia is transitioning towards independent power and water projects to address the escalating power requirements and broaden the array of energy sources via the National Renewable Energy Program. This will be accompanied by a substantial rise in non-oil government income and the private sector's contribution to GDP. 1.

Will Saudi Arabia invest \$270 billion in low-carbon energy projects?

Saudi Arabia has declared its intention to invest \$270 billion in low-carbon energy projects by the year 2030. Table 3 shows major investment projects in Saudi Arabia for energy transition. Table 3. Overview of major investments in Saudi Arabia's energy transition and RE initiatives RE = renewable energy; SAR = Saudi Riyals.

How does Saudi government support the energy savings sector?

The government is committed to supporting the development of the energy savings sector, leveraging entities like the Saudi Energy Efficiency Center (SEEC) and TARSHID, a company with approximately \$500 million capital dedicated to supporting energy projects in the public sector. 4.

The strategic alliance, which was signed at LEAP 2024, by Mr. Saeed Al Saeed, CEO of Cyberani, and Mr. Pierre-Yves Jolivet, VP of Cyber Digital Solutions, at Thales, aligns with the Kingdom's Vision 2030, emphasizing the importance of cybersecurity and digital infrastructure in building a diversified and sustainable

economy.

Saudi Electricity Company (SEC) is a majority state owned company headquartered in Riyadh, Saudi Arabia. In 2020, its revenue was USD 18.3 billion and installed capacity was 53 GW. SEC is the biggest producer of electricity in Saudi Arabia and has a monopoly on the transmission and distribution of electric power in the Kingdom.

Saudi Arabia plans to become the region's renewable energy hub by 2030. Hear from the Invest Saudi team about their energy transition goals and how Saudi Arabia is transitioning towards sustainable and clean energy.

Saudi Arabia's AMI project progresses with 10 million smart meter rollout Webinar recording: Asset Investment Planning; Management - Future proofing for Middle East Utilities and Infrastructure How smart utility meters help households make better choices. SEC initiated its approximately 10 million smart meter rollout in January of this year.

JASE-W dispatched a Public-Private Joint Energy Business Delegation to the Kingdom of Saudi Arabia to actualize and accelerate cooperation in the field of energy which was stipulated in the "Saudi-Japan Vision 2030".
