

Selling solar generators on the street

Can you sell solar energy back to the National Grid?

Householders and businesses with solar panels installed, who generate more renewable electricity than they need, can sell energy back to the National Grid under the Smart Export Guarantee (SEG). An increasing number of people are now benefiting from this government-backed initiative, and you could be one of them.

How can a home owner make money from selling solar energy?

Earn money: Homeowners can earn money by selling back electricity to the grid in the UK through programs like the Smart Export Guarantee (SEG). Reduced carbon emissions: Selling excess solar energy back to the grid can help reduce the need for fossil fuels and decrease carbon emissions.

How can I earn from selling electricity back to the grid?

The best way to earn through selling electricity back to the grid in the UK is by using the Smart Export Guarantee scheme. Since January 2020, the Smart Export Guarantee scheme has offered small-scale low-carbon energy generators an opportunity to sell solar energy to the grid in the UK.

How do I sell excess electricity generated by my solar PV system?

To sell excess electricity generated by your solar PV system, you need to apply directly to a licensed SEG tariff supplier. Your SEG licensee doesn't have to be your current top-up electricity supplier. You can choose different companies for SEG payments, electricity supply, and gas supply.

Can you sell solar energy through SEG?

No, at the moment, the only option for homeowners is to sell excess solar energy back to the grid or store it using battery storage for future use. Are there special requirements to sell energy through SEG? Yes, The SEG requires your solar panels to be under 5MW capacity and you must have an MSC certificate for installation.

How do SEG generators get paid?

Under the initiative, SEG generators - small-scale low-carbon electricity producers - are paid by SEG-licensed electricity suppliers for selling excess energy that they export to the National Grid. Licensees set their own SEG tariff rates. SEG tariffs are designed for five renewable energy technologies:
