

What is Senegal's energy policy?

The IEA's Energy Policy Review of Senegal 2023, published today, finds that energy is at the heart of Senegal's 2035 strategy for accelerating sustainable development and economic growth known as the Plan S&#233;n&#233;gal &#201;mergent(PSE), or the Emerging Senegal Plan.

How will Senegal's power sector be strengthened?

Senegal's power sector would be strengthened by continued diversified investment in power, including renewables and natural gas, while phasing out heavy fuel oil. Senegal Energy Outlook - Analysis and findings. An article by the International Energy Agency.

What is Senegal's energy strategy?

Senegal's energy strategy is to divert the HFO-rich energy mix away from only fossil fuels and towards gas and renewables. Senegal has yet to develop its gas industry and related infrastructure.

How has Senegal reformed its energy sector?

Since the launch of the Plan S&#233;n&#233;gal &#201;mergent, Senegal has adopted reforms designed to attract foreign investment in its energy sector and boost participation from the private sector, while leveraging significant support from development finance institutions.

Can Senegal use natural gas to generate electricity?

Senegal has major ambitions to use domestic gas resources to generate electricity through its "gas--to--power" strategy decided in 2018, which aims to reduce national energy dependence on oil and coal by incentivising investment in natural gas as a transitory fuel in the energy transition.

Does Senegal have a hydro power plant?

Note: The generation capacity includes hydro, physically produced in Mali but owned and used by Senegal within the framework of the Senegal River Basin Development Authority. Sources: IEA analysis based on IEA (2023), World Energy Balances; Senelec (2023), Annual Report 2022, Senelec (2022), Annual Report 2021.

Moreover, SENELEC also buys the surplus of renewable energy generated by self-producers. In 2013, the Republic of Senegal adopted the strategic energy plan, which aimed to increase the energy mix dynamic in the country for a five years (2013-2018). The energy mix refers to the development of power generation from coal, gas, hydro, solar and wind.

Gas production from Sangomar will provide the energy needed to power a plant with a capacity of between 350 and 590 MW, while the St. Louis offshore block could power a 250 MW plant. ... Ministry of Petroleum and Energy (MPE) of Senegal; la Soci&#233;t&#233; Nationale d'&#201;lectricit&#233; du
