

What type of energy is used in Serbia?

Energy in Serbia is dominated by fossil fuels, despite the public preference for renewable energy. Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%).

What is Serbia's energy supply in 2021?

Serbia's Total Energy Supply is almost 700 PJ, with the energy mix in 2021 comprising coal (45%), oil (24%), gas (15%), and renewables (16%). Bioenergy and hydroelectric power were the leading contributors within the renewable energy category, accounting for 67% and 29% of the renewable supply, respectively.

How many MW of electricity does Serbia have?

Installed capacity of hydro power is 2,835 MW and as of December 2019 wind power capacity is 500 MW. Serbia also makes use of geothermal and solar energy, currently 27% of Serbia's electricity comes from hydro while 4% comes from other renewables. Additional 600 MW of wind capacity is planned by 2030.

What percentage of Serbia's electricity comes from coal?

Serbia's national power utility Electric Power of Serbia (EPS) produces nearly 70 percent of the country's electricity from coal and nearly 27% percent from hydropower, with approximately 4% coming from private developers in wind and solar energy. Serbia heavily subsidizes coal and electricity prices, inhibiting competition.

Does Serbia have a solar project?

The contract is the latest in a line of solar projects backed by Serbia's Ministry of Mining and Energy this year, which includes plans for a 1 GW solar panel factory and another 500 MW of solar. Figures from the International Renewable Energy Agency state Serbia had deployed a total 137 MW of solar by the end of last year.

How much hydropower does Serbia have?

Serbia has plans to significantly expand its installed hydropower and renewables capacity in the coming years. It currently has a total capacity of approximately 3490 megawatts (MW) of renewables, with 2342 MW in hydropower in 2019 according to the European Energy Community.

In this analysis of energy efficiency, the Energy Efficiency Building Codes in the Republic of Serbia was used as a basis for calculating losses [33], which is based on the International Standard ...
