

Serge energy Antarctica

Is Serge energy a fraud company?

tonight, I reported the company Serge Energy to the Finnish police for a case of fraud. According to to my opinion, it is very important that everyone files a report. You can find further information at the following links: Serge Energy has been a member of Bioenergy Europe from 2019 to 2023.

Why is energy security important in Antarctica?

Energy security is vital for research stations in the Antarctic. Energy is required to support essential needs, such as heating, fresh-water supply, and electricity, which are critical for survival under harsh environmental conditions .

Are there alternative energy sources in Antarctica?

Interest in alternative energy sources in Antarctica has increased since the beginning of the 1990s [1, 6]. In 1991, a wind turbine was installed at the German Neumayer Station . One year later, in 1992, NASA and the US Antarctic Program tested a photovoltaic (PV) installation for a field camp .

What is the energy demand in Antarctica during winter?

Overall, it can be seen that during the Antarctic winter the energy demand is highest, even when the population of a station is the lowest. The energy demand for Jang Bogo Station and King Sejong Station is shown in Figure 4 as primary fuel demand. Figure 4.

Are Antarctica's research stations using wind to generate electricity?

Wind-energy use is becoming increasingly prevalent at Antarctica's research stations. The present study identified more than ten research stations that have been using wind to generate electricity. The installed wind capacity, as identified by the study, is nearly 1500 kW of installed capacity.

Can renewable electricity be used in Antarctica?

Several renewable electricity generation technologies that have proven effective for use in the Antarctic environment are described, as well as those that are currently in use. Finally, the paper summarizes the major lessons learned to support future projects and close the knowledge gap.
