

Shanshan Microgrid

The microgrid self-healing problem is formulated as a mixed-integer quadratic programming problem, which provides a globally optimal solution to facilitate smooth islanding of the microgrid. A modified Consortium ...

Optimal self-healing strategy for microgrid islanding eISSN 2515-2947 Received on 3rd April 2018 Revised 14th July 2018 Accepted on 18th September 2018 E-First on 23rd October 2018 doi: ...

????????????????????,????????????????,????????????????,???????????????? ...

The effectiveness of the proposed method is verified by the system simulation of YALMIP and GUROBI. Compared with the traditional method, the total cost of the microgrid is ...

DOI: 10.1016/j.swevo.2017.02.003 Corpus ID: 45513009; A feasible method for controlled intentional islanding in microgrids based on PSO algorithm @article{Oboudi2017AFM, title={A ...

Yongjun Lin, Xin Chen, Kai Yang, Shanshan Zhou, Qingfei Bai. Bilevel Distributed Optimal Dispatch of Active Distribution Network with Multi-microgrids[J]. Journal of System Simulation, ...

Because of the uncertainties and significant fluctuations of both power generation and consumption in a microgrid, the lead-acid battery energy storage system (BESS) endures too ...
