

Sheep and photovoltaic panels

Stung by high fuel costs and a labor squeeze, some clean energy companies are turning to an unlikely ally -- flocks of sheep -- to keep their solar panels out of the shade. Visual media produced ...

Situating photovoltaic panels and food production together may ease land-use tensions between solar and agriculture, say some experts. ... The winner among livestock so far has been calm, ...

Sheep grazing in a field of solar panels is becoming an increasingly common sight as both farmers and solar developers are starting to experiment with co-locating solar photovoltaic (PV) systems and agriculture. ...
