

What if I have forgotten the password for the inverter?

If you have forgotten the password for the inverter, you can unlock the inverter with your product key. If you have lost your product key, you can reset your password as described in ( > Product Key Lost).

Why is the new PV system password NOT applied to inverters?

The new pv system password created in Sunny Portal has not been applied to the inverters. This can happen, for example, if the devices cannot be accessed or are not feeding during registration.

How do I set a password for a PUK inverter?

In the Plant password field, enter the PUK, and confirm using [Enter]. In the plant directory, select the desired inverter. Select the parameter group [User Rights]--> Access Control. Select [Edit] and assign a new password to the affected user group. For additional inverters, repeat points 2-7.

How do I Reset my Fronius solar inverter password?

The password can be reset as follows: On the user interface of the inverter, click on "Forgot password" to generate a PIN. On Fronius Solar.SOS, go to "Recovery Key" and fill out the mandatory fields to generate a recovery key. On the user interface of the inverter, enter the generated recovery key and set your new password.

Why can't I access the inverters with my current password?

If you notice that you cannot access the inverters with your current password, or no data appears in Sunny Portal, please try again with the "old" Installer password. Your installation company changed the default system password 1111 to a new password that you do not know.

Why can't I access my inverter?

The inverter (s) can no longer be accessed (displayed with a lock symbol). The plant/system password for the inverter (s) has been forgotten. A forgotten system password can be enabled with a PUK (Personal Unlocking Key). For each inverter, one PUK per user group respectively is required. With 1 PUK, 1 inverter can be activated.

Specify whether the inverter functions as a master or a slave. In a system with a single inverter, designate it as the "master." For setups with multiple inverters connected in parallel, assign ...

The Hybrid Inverter is a battery and PV inverter in one. It is bi-directional, meaning it can charge from the grid (AC coupled) and from solar (DC coupled). Storing the Inverter The unit must be ...
