country's fragile economy as well. Sierra Leone's Integrated Resource Plan identifies solar as the least-cost solution with its low cost to replace thermal generation. It proposes the development of up to 100MW of solar through 2025 and another 80MW of solar and storage by 2027; the initial investment is defined as 45MWp solar in 2022. 6.

In ideal conditions, a 1kW plant generates 4 units in a day. Thus, a 1000kW or 1 MW plant would generate: $4 \times 1000 = 4,000$ units in a day $4 \times 1000 \times 30 = 1,20,000$ units in a month However, it is crucial to note that solar generation can be affected by elements like weather, the orientation of panels, the quality of equipment, location, maintenance, etc.
