

Sierra Leone c energy company

What is Sierra Leone's energy sector?

Sierra Leone's energy sector is made up of a network of stakeholders. Each has specific and clearly defined responsibilities, albeit these should be in alignment with the overarching goal of providing reliable, affordable and sustainable power to the people of Sierra Leone [12,58].

Who is developing Sierra Leone's first independent power project?

Project sponsors Milele Energy and TCQ Power are developing the project - the first utility-scale, independent power project in Sierra Leone, which will be constructed by Shapoorji Pallonji with gas and steam turbine equipment as well as long-term servicing, and operation and maintenance from Siemens Energy.

Why does Sierra Leone rely on temporary electricity?

As a result of the cost of electricity provision from ageing power plants in Freetown (and in Sierra Leone more generally) - with their very high Operation and Maintenance (O & M) costs - the country is largely dependent on temporary electricity supply [3].

How much electricity does Sierra Leone have?

Of those that have access, 17% are connected to the grid and another 2-3% are connected to solar, mini-grid or portable home energy systems [ibid]. The main source of electricity from the grid in Sierra Leone is from the Bumbuna Hydropower scheme, which operates at approximately 50 MW during the rainy season [2] and 8 MW in the dry season. 2

Why does Sierra Leone need a flexible electricity system?

Countries like Sierra Leone are also under political and economic pressure to restructure their energy sectors and reform their utilities, which have often failed to develop flexible electricity systems that can provide firms with a reliable supply and people with access to electricity.

Why is solar power costly in Sierra Leone?

Solar power is delivered at a very high cost in Sierra Leone, despite the country having an estimated hydro project potential of more than 1000 MW and abundant sunlight for solar power generation, with opportunities above 240 MW.
