

What is phelas energy storage?

We at phelas are developing an electricity storage system to use solar and wind power even when the sun is not shining and the wind is not blowing. Our Aurora Liquid Air Energy Storage (LAES) system is at the heart of this vision, transforming renewable sources into a stable, around-the-clock power supply.

How does phelas work?

With this approach, phelas aims to completely eliminate the need for fossil electricity production. The replacement of coal and gas plants necessitates large electricity storage capacities. Renewable energy sources provide energy only when the sun shines and the wind blows - which is not always.

How does phelas liquefy a cryogenic liquid?

The phelas-team is developing Aurora, a standardized, modular, mass-manufactured and cheap large-scale electrical storage system that uses electricity during the charging process to cool air down to cryogenic temperatures and thus liquefy it. For discharging, the cryogenic liquid is heated and thus evaporated.

How phelas is preparing to protect its intellectual property?

With the financial help of public institutions, phelas has already been able to develop and construct a demonstrator in the laboratory of the Technical University Munich. Moreover, the team is preparing to protect their intellectual property as well as simulating use cases.

At Phelas, we are actively participating in the energy transition by bridging the gap between renewable energy storage and power supply stability. To learn more, visit our website.

"Phelas" Liquid Air Energy Storage (LAES) offers many features that cannot be covered by conventional technologies. We use air and gravel as the main storage medium - both materials are universally available and, ...

Based in Munich, Germany, phelas was established in 2020, focusing on revolutionizing the energy storage sector with the vision of "Making 100% renewable energy globally a no-brainer". phelas specializes in the ...

At phelas, we're innovating the future of energy storage with Aurora and Catalyst. Aurora, our containerized Liquid Air Energy Storage (LAES) solution, is designed to reshape the energy storage landscape. ... Track: Energy Markets. Operational tasks related to energy markets; Collect, validate and analyse market data on energy production ...

Phelan Green Energy revolutionises energy storage, powering tomorrow's sustainable solutions with efficiency and sustainability at the forefront. Click for our Team. About Us. Established in 2005, Phelan Green Energy, under the guidance of founder Paschal Phelan, stands as a global leader in renewable energy,

Singapore phelas energy

headquartered in Cape Town, South ...

Founded in 2020, phelas is developing Aurora, a modularised and scalable energy storage system based on a new proprietary air liquefaction and thermal management process to achieve low-cost, scalable sustainable, and easy energy storage. Phelas has already been working with customers to accelerate energy storage deployment through Catalyst ...

Munich, Germany - 06.03.2024 - phelas, a pioneer in the energy storage sector, announced today a seed financing round of EUR4.1 million. This investment round is led by E44 Ventures, an Israel-leading climate tech fund, with participation from Axon Partners Group, Deutsche Telekom hub:raum Fund, BNV Partners, other investors and existing angel investors.

Founded in 2020, phelas develops and builds Liquid Air Energy Storages (LAES) for wind and solar energy. The team is currently prototyping a unique standardized, modular, mass-manufactured and cheap large-scale electrical storage system: Aurora. The system uses the proven concept of liquid air storage. During the charging process air is cooled ...

Phelas is a producer of a liquid air energy storage device intended for utilities, grid administrators, businesses, and producers and operators of renewable energy sources. The company's solution allows for the storage of wind and solar energy and is adaptable in terms of power storage capacity and physical location. It also poses no damage to

phelas, a provider of long-duration energy storage solutions, secured EUR4.1 million (~\$4.5 million) in seed funding. The round was led by E44 Ventures, an Israel-leading climate tech fund, with participation from Axon Partners Group, Deutsche Telekom hubraum Fund, BNV Partners, other investors, and existing angel investors.

Catalyst embodies precision in energy asset planning. Our software distills complex energy data into clear, actionable strategies, tailored to your specific operational needs offering advanced analytics and a streamlined planning process, Catalyst is the cornerstone for businesses looking to optimize their energy storage investments with confidence and clarity.

Developer of a liquid air energy storage system designed for utilities, grid operators, industry, renewable energy developers, and operators. The company's system is flexible in sizing power storage capacity and physical location, causing no environmental and health risks from deployed materials, enabling users to store wind and solar energy.

phelas - 100 percent renewable energy through innovative liquid air energy storage The phelas-team is developing Aurora, a standardized, modular, mass-manufactured and cheap large-scale electrical storage system that uses electricity during the charging process to cool air down to cryogenic temperatures and thus liquefy it. For discharging, the ...

Phelas raised EUR4.1m in a seed round led by E44 Ventures, joined by investors including Axon Partners Group, Deutsche Telekom and BNV Partners. Energy Manufacturing. Investments. 07 February 2024. ... fel'd energy raised EUR1.7 million in a pre-seed funding round led by HV Capital, with participation from Angel Invest and angel investors in ...

Phelas, a Munich-based innovator in the energy storage sector, has successfully raised EUR4.1M in a seed funding round. The investment was led by E44 Ventures, an Israeli climate tech fund, with additional support from Axon Partners Group, Deutsche Telekom hub:raum Fund, BNV Partners, other investors, and existing angel investors.

September 7, 2023 - Munich (Germany). In the series of a closer look into phelas" team and their personal stories, we spoke to Leon. We discussed how phelas came into existence, sparked by his academic work, personal motivation and ...
