

What is skykraft & how will it impact Sweden?

SkyKraft will be a first-of-its-kind and strengthen northern Sweden's leading position in the energy transition. The new facility could play a decisive role in the transition of aviation in Sweden, the EU, and globally.

What type of energy is used in Sweden?

Historical energy consumption in Sweden by source. Renewables and nuclear are given as the electricity produced. Energy in Sweden is characterized by relatively high per capita production and consumption, and a reliance on imports for fossil fuel supplies.

Who are SkyNRG & Skellefte Kraft?

SkyNRG, a leading SAF company, and Skellefte Kraft, one of Sweden's largest renewable energy producers, have announced plans to develop an innovative eSAF project. With significant demand for eSAF expected by 2030, this project aligns with the European ReFuelEU SAF blending mandate and the UK's blending mandate.

Could Skellefte become Sweden's largest sustainable jet fuel?

Since autumn 2022, Skellefte Kraft has investigated the possibilities for a new large-scale industrial venture in Skellefte, which if fully developed could become one of Sweden's largest in sustainable jet fuel. Suitable land for the venture has been identified on Näsudden in the Port of Skellefte.

Is Sweden the quickest growing country on wind power?

"Sweden is Europe's quickest growing on wind power". The Independent Barents Observer. Retrieved 6 February 2017. "the advanced energy [r]evolution : A SUSTAINABLE ENERGY OUTLOOK FOR SWEDEN" (PDF). Greenpeace.org. Archived from the original (PDF) on 5 March 2016. Retrieved 10 January 2018. "Renewables 2014 Global Status Report, page 56" (PDF).

How much wind power does Sweden have?

Sweden has wind power potential of 510 TWh/a at land and 46 TWh/a at sea. Consumption was 140 TWh of power in 2010. In 2013 Sweden was second top country for wind power capacity per inhabitant in the world: 488 W per person, only surpassed by Denmark (863 W per person).
