Solar trickle chargers can regulate the amount of charge that flows into the battery. This is important because it prevents overcharging, which can damage the battery. Unlike conventional solar car battery chargers, solar trickle chargers are designed to provide a constant, low-level charge to the battery, hence the term "trickle."

These chargers are way faster than granny/trickle-lead chargers. Charging at home using smart home chargers saves EV owners much money compared to public charging stations, especially when it draws power from solar panels. At EV PowerHouse we stock EV charging stations and cables that meet Australian standards.
