

What is the primary energy supply in Slovenia?

Total primary energy supply (TPES) in Slovenia was 6.80 Mtoe in 2019. In the same year, electricity production was 16.1 TWh, consumption was 14.9 TWh. The transportation and industrial sectors were the largest consumers of energy in Slovenia in 2019.

Does Slovenia use oil to generate electricity?

Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy sources other than hydropower (e.g., biofuels, solar PV, waste, and wind) together provided 3.5% of total electricity generation in 2019.

Does Slovenia have gas storage facilities?

Slovenia does not have gas storage facilities, with companies dependent on infrastructure in Austria and Croatia. Slovenia has expressed interest in securing U.S. LNG sources via terminals in Krk, Croatia, or Rovigo, Italy, to diversify its supply away from Russia.

How can Slovenia transition to low-carbon energy sources?

Slovenia is seeking to gradually transition to low-carbon energy sources by focusing on efficient energy consumption, increased use of renewable energy sources, and the development of active electricity-distribution networks.

What is Slovenia's electric power transmission network?

Slovenian electric power transmission network is well connected to the European electric power transmission network. Slovenia is among the member states with medium dependency, i.e. about 50 % of consumed energy is produced in the country and it is completely dependent on the import of liquid and gas fuels.

Why is Slovenia rethinking its energy policy?

Russia's February 2022 invasion of Ukraine, however, forced Slovenia to reconsider its energy policy and seek alternate sources. Slovenia does not have gas storage facilities, with companies dependent on infrastructure in Austria and Croatia.

The Port of Koper is Slovenia's only international cargo port and is therefore of strategic national importance. ... as well as having the largest container terminal in the Adriatic, where almost one million container units (TEUs) are handled annually; ... representing savings of time and energy and a consequent reduction in emissions of ...
