

Why is Kazakhstan's Energy Technology a critical area of research?

This makes Kazakhstan's energy technology and policy a critical area of research, as it can provide valuable insights into how a resource-rich nation transitions to cleaner energy sources and contributes to the global effort to combat climate change.

How much does re contribute to energy consumption in Kazakhstan?

Despite possessing high potential and capacity in the RE sector, it currently contributes less than 1% to the overall energy consumption in Kazakhstan. As a response to this, the authorities have set a target to raise the RE contribution to 11% by 2030.

Does Kazakhstan have a new energy system?

Babazhanova Z, Khambar B, Yessenbekova A, Sartanova N, Jandossova F (2017) New energy system in the republic of Kazakhstan: Exploring the possibility of creating and mechanisms of implementing. Int J Energy Econ Policy 7 (6):164-170

Is Kazakhstan at a crossroads in its energy sector?

Kazakhstan, a vast and resource-rich nation in Central Asia, is at a crossroads in its energy sector. With a growing emphasis on sustainability and a need to align with global decarbonization efforts, the country is embarking on a transformative initiative that aims to ensure the security and reliability of its energy supply.

Why does Kazakhstan need green energy?

Firstly, as urbanization accelerates, particularly in megacities, Kazakhstan is experiencing increased pollution and environmental challenges, prompting a demand for "green energy" solutions. Secondly, there is a growing need to enhance the country's scientific and technological capabilities.

Why should electricity demand increase in Kazakhstan?

Electricity demand should increase as a consequence of economic growth, especially in large administrative centers such as Almaty and Astana. In response to this, the Kazakh authorities have undertaken some policies related to upgrading the old power system and investing in RE resources.

The results help to improve the energy efficiency of eco-houses in Kazakhstan by using renewable energy sources. Social benefits are associated with the use of local raw materials. ... Yussupov, A.N. and Yussupova, A.A. (2022), "Ecological houses of Southern Kazakhstan using renewable energy sources", Smart and Sustainable Built Environment ...
