

Smart energy geeks South Sudan

Does South Sudan have electricity?

The war has destroyed South Sudan's limited infrastructure, triggering an economic implosion. What electricity it has--and it is the least electrified country in the world--depends entirely on imported diesel to run generators.

How many energy companies are there in South Sudan?

There are about fourteen of-grid energy companies in South Sudan, and their services include i) selling solar products, ii) engineering, procurement, and construction (EPC), iii) independent power production (IPPs) and iv) developing mini-grids.

Are solar devices a problem in South Sudan?

The second hurdle is the lack of awareness, with 8% of urban and rural populations reporting a lack of knowledge about solar devices. The third barrier to greater penetration of solar devices in South Sudan is poor consumer perceptions of solar product quality.

Do health institutions in South Sudan have access to electricity?

About 30% of South Sudan health institutions do not have access to electricity. However, there were disparities where 15.0% of health institutions in urban areas lacked access to electricity compared to 33.2% of health institutions in rural areas reported lacking electricity access.

What is the solar market in South Sudan?

Based on the solar access rates and willingness to pay assessments, the total addressable market for solar products in South Sudan is USD 143,431,722, and the total serviceable market is USD 44,052,848. The total potential consumer base is 1,226,483 households, about 90% of the population.

Is South Sudan a good place to buy energy?

Based on independent sources from consumers and suppliers, most of-grid energy products available in South Sudan are neither standardised nor quality verified. This hinders uptake, as many households reported quality to be a main factor in their purchase decision, especially in urban areas.
