Automate your home's temperature with a smart thermostat to save money on energy bills. Stop hidden power drains Use the app to turn off connected devices like TVs and gaming consoles when not in use.

A smart home uses internet connected devices to help you to manage and monitor appliances and systems in your home. Whether that's a smart meter that shows you how you're using energy throughout the day, a smart thermostat that enables you to schedule your heating and hot water, or smart lighting that wakes you automatically in the morning.

However, newer "smart" home energy monitors will look for unique energy use patterns even within the same breaker to try to recognize appliances. If your water heater and your washing machine are on the same breaker, by recognizing the distinct ways each one uses power, a smart energy monitor can learn to differentiate the two in the usage ...

Unsere Smart Energy-Geräte bieten vollständige Transparenz und Kontrolle kompatibler Haushaltsgeräte, abhängig vom Modus: Manueller Modus Setzt jeden Betriebsmodus oder Zeitplan außer Kraft, indem ein Gerät manuell ein- und ausgeschaltet wird.
