

Hi everyone, is there anyone who knows if the Hombli Smart Plug works with Home assistant? He works through tuya Thank you for your response. JmartinHA (James W Martin, Jr.) November 29, 2022, 9:40pm 2. I have many Tuya devices in my Home Assistant instance. Don't know why those shouldn't work. ...

Well, thanks to various posts from this community, I finally figured out how to control Amazon smart plugs from Home Assistant (without going through nabu casa). I'm using the Alexa Media Player (downloaded from HACS) to trigger the routines in Alexa, in conjunction with emulated_hue to maintain the states between Alexa and HA. ...

I wanted to consolidate my experience of connection my Victron Grid Connected MultiPlus II (or any Victron inverter) into HA. I then extended that into EMHASS to allow manage of import/export. My Hardware: Victron ...

My start with Home Assistant. I started with Home Assistant in the summer of 2018. I think I was on version .73. My home automation controller at the time, Veralite, had served me well but was becoming unstable, ...

I'm trying to add the ESS Assistant in the Victron configuration tool. It requires a Grid-Code which is not available for North America. I don't have a grid tied system. ... Does anyone know of an alternative to the ecoflow smart home panel that could be used with an existing battery bank (10kw LiFep04 cells). I like the functionality of the ...

Did you know you can actually shut off the inverter over that Smart ESS app, and even logging into the web browser? Bit odd functionality if you ask me. Who really has access to this inverter when that dongle is connected.

I own a GE Profile Electric Range and have been looking around for an Integration for Home Assistant but there seems to be none. There is some excellent work being done here: ajmarks/gekitchen: Python SDK for GE smart appliances (github) but it seems there some entity types missing. I think that SmartHQ Home (smarthqsolutions) covers ...

After using Home Assistant and openHAB, I find Home Assistant to provide easier customization options, with cleaner user interfaces. There are some awesome dashboards you can find online that really show off the power of Home Assistant (to be fair, there are some awesome openHAB dashboards as well, I just like the options Home Assistant provides more).

Alpha ESS in Home Assistant. speedyhb; 1. Dezember 2022 um 00:13; Unerledigt; ... Smart Home. steffen_h; 10. Februar 2022 um 21:43; technische Fragen; Hersteller-Links >> ALPHA-ESS Homepage >>

ALPHA-ESS Monitoringportal für Heimspeicher >> ALPHA-ESS Monitoringportal für Gewerbe- u. Industriekunden

Was wondering about current thoughts on locks compatible with home assistant. I would prefer to have something that supports finger print, pins code and some method such as key to access or connect to backup power via ...

Click Create in the top right hand corner.; This test event is a Discovery directive, your Home Assistant instance will respond with a list of devices Alexa can interact with. Since this test data is lacking a token in payload.scope, and your ...

If you have completed the checklist above and are still unable to setup the platform, activate debug logging for the SmartThings integration and include the log messages up until the point of failure in a new issue. Debugging . The SmartThings integration will log additional information about push updates received, events fired, and other messages when the log level is set to ...

The Ultimate Guide to Using Home Assistant with Alexa for Smart Home Automation. If you're looking to take your smart home automation to the next level, chances are you've already heard of Home Assistant and Alexa. Combining these two technologies can result in a seamless experience for controlling every aspect of your smart home.
