

Smart solar up Myanmar

Will Myanmar build solar power plants?

On the occasion, Secretary of the State Administration Council Lt-Gen Aung Lin Dwe said as Myanmar is rich in renewable energy sources such as hydropower, solar and wind power, it will make full use of the advantages provided by the nature and build solar power plants.

Is Myanmar a good place to invest in solar power?

According to a study on solar resources and solar PV potential in Myanmar conducted by the World Bank, most of the population (75%-85%) lives within a 25-50 km radius of HV power lines, making it a promising location for medium- and large-scale solar projects. In 2017, peak demand reached ~3000 MW.

Does Myanmar have solar energy?

Levels vary widely across this geographically diverse Southeast Asian nation, but on the whole, Myanmar is endowed with an abundance of solar energy resource potential, an average solar irradiance of 4.5-5.1 kilowatt-hours per square meter per day (kWh/m²/day).

Is Myanmar a good country for generating electricity?

Renewable energy, in the form of large-scale hydroelectric power, already accounts for around 60%, the single largest share, of Myanmar's electricity generation mix. The country also has an abundance of natural gas, an important export and the source of hard, foreign currency export revenues, as well as domestic power generation.

Is lighting Myanmar a key element of Myanmar's universal electrification initiative?

Lighting Myanmar, a program led by the International Finance Corporation (IFC), is a key element of Myanmar's universal electrification initiative, SolarPower Europe's Myanmar research team pointed out.
