

Solar Energy Storage Device Scam

Are free solar panels a scam?

Know that "free" or "no cost" solar panel offers are scams. The federal government does not install solar systems in homes for free. If you're considering whether solar energy is right for you, check out the Department of Energy's guide for homeowners and learn more. Or check out the Department of Treasury's guidance on clean energy.

What is a solar energy scam?

The scams vary, but here's the gist: someone claiming to be with the government or your utility company promises big savings on your utility bills from solar energy or other home improvements designed to increase energy efficiency. If you agree to the scammer's offer, it could cost you tens of thousands of dollars.

How do I avoid solar scams?

Here are some of our recommendations for avoiding solar scams: The saying "there's no such thing as a free lunch" applies when shopping for solar! If you see ads on social media or have a door-to-door salesperson stop by your home and share special programs that pay you to go solar, they're likely not legitimate.

What should I do if a solar business is a scam?

Protect your personal information. Don't respond to unexpected requests online or on social media for your name, address, or other personal information to "see if you qualify." At best, this is someone generating leads to sell, not actual solar businesses. At worst, they're scammers trying to steal your identity.

What if my company offers solar energy?

If your company offers solar energy, remember that claims must not only be truthful, but also comply with established consumer protection laws, including the FTC Act and the FTC's new Impersonation Rule. Be truthful. Every clean energy company has a responsibility to be honest and upfront with consumers. Be transparent about what you're offering.

Can a solar energy audit help you save money?

The so-called official offers you an "energy audit" to reduce your utility costs. Or they might try to sign you up for a "free" program to make your home more energy efficient with solar energy. While they might say they're from your utility company or the government, they're not.

Solar scams are rare, but on the rise as more and more consumers install panels at their homes. While just 1.5 percent of households report being dissatisfied with their solar installations, according to a Forbes ...

For energy-related applications such as solar cells, catalysts, thermo-electrics, lithium-ion batteries, graphene-based materials, supercapacitors, and hydrogen storage systems, nanostructured materials ...

Solar Energy Storage Device Scam

Here presented a brief description of the principles of operation and features of various types of both solar cells and energy storage devices. It was noted that as much as ...

Solar panel scams target homeowners interested in installing solar energy systems. They involve scammers making false promises or tricking you into paying for services you'll never receive. Recently, the FTC also ...

These scams start with an unexpected phone call, message on social, or even an in-person visit. The so-called official offers you an "energy audit" to reduce your utility costs. Or they might try to sign you up for a "free" program to make your ...
