

Solar Magnet Bracket

How do I attach a rare earth magnet to a solar panel?

Our rare earth magnet kit includes 8 or 12 magnets and adhesive to attach the magnets to the upper side of the solar panel. Using the magnet mounting kit is easy. Attach magnets to each corner of the solar panel and optionally attach two near the center of larger flexible panels using the included double sided adhesive tape.

What is included in a solar panel mount kit?

Each kit includes all the materials needed to mount your solar panel. The top-of-pole solar panel mount is designed to set atop our 1.5 inch OD stainless steel rotating pole. The standard pole height is 66 inches. A custom pole height can be specified at the time of order.

How do you mount a solar panel to a deck?

Kit includes 12 high strength rare earth magnets and 6 adhesive tabs to attach the magnets to the upper side of the flexible solar panel. There are at least three ways to mount the semi-rigid solar panels on a rigid surface. They can be screwed down directly to the deck surface at each corner.

How do you mount a solar panel?

Using the magnet mounting kit is easy. Attach magnets to each corner of the solar panel and optionally attach two near the center of larger flexible panels using the included double sided adhesive tape. Position the flexible solar panel on the bimini or dodger and attach a mating set of magnets on the underside of the canvas.

Can a magnet-mounted solar charger be used on a tin-corrugated roof?

We see this as being useful for attaching panels to a tin-corrugated roof on top of something like a railroad car if you're trying to solar power a GPS monitor. Can you think of other applications for a magnet-mounted solar charger? Here's some quick pictures of our 6 Watt solar panel from around the neighborhood.

How do I Mount my solar panels to my boat?

Customers have found that using our canvas bolt-on kit works well for mounting our semi-flexible marine solar panels directly to their boat's bimini or dodger canvas. The kit includes fender washers to secure the bolt to the canvas, a bolt and nut to tighten the washers to the canvas and an acorn nut to secure the solar panel to the bolt.

We've got ways to mount solar panels, zip ties, suction cups and with handlebar mounts and now we're exploring magnets. We see this as being useful for attaching panels to a tin-corrugated roof or on top of something like a railroad ...
