

Solar Photovoltaic Panel Work Experience

What are the career progression opportunities for solar panel installers?

There are various career progression opportunities for solar panel installers, including becoming a lead installer, transitioning to a solar system designer role, exploring sales and business development, or starting their own solar installation business.

How many jobs does a solar photovoltaic installer have?

Depending on the job and state laws, PV installers may connect the solar panels to the electrical grid, although electricians sometimes do this task. Solar photovoltaic installers held about 17,100 jobs in 2021. The largest employers of solar photovoltaic installers were as follows:

What skills does a solar photovoltaic installer need?

Solar photovoltaic installers must be able to work with power tools and hand tools at great heights, and possess in-depth knowledge of electrical wiring as well as basic math skills. When necessary, installers must be problem solvers, able to repair damaged systems or replace malfunctioning components.

What does a solar photovoltaic installer do?

Solar photovoltaic installers are key to the process of solar panel installation and maintenance. They use specialized skills to install residential and commercial solar projects. They are responsible for safely attaching the panels to the roofs of houses or other buildings and ensuring that the systems work.

What is the career outlook for solar panel installers?

As a result, the career outlook for solar panel installers is exceptionally promising. Employment in this sector has been steadily increasing each year, driven by the continuous adoption of solar energy solutions by both residential and commercial sectors.

How much do solar photovoltaic installers make a year?

The median annual wage for solar photovoltaic installers was \$48,800 in May 2023. Employment of solar photovoltaic installers is projected to grow 48 percent from 2023 to 2033, much faster than the average for all occupations. About 4,100 openings for solar photovoltaic installers are projected each year, on average, over the decade.
