What are solar science experiments for kids?

Solar Science Experiments for Kids are a fun way to teach children about renewable energy sources. These experiments are geared for children ages 5-10, but may be adapted for all ages. My daughter is getting VERY excited about her upcoming week at science camp!

How do you teach kids about solar energy?

Activity: Use flashcards with words like "Sun," "Light," and "Energy." Each card will also have a picture illustrating the concept. Game: Place the flashcards face down. Let children pick a card, then say the word and show the picture. Help them associate the word with the picture and its meaning related to solar energy.
