

Solar Power Generation Warranty

Do solar panels have a warranty?

Production guarantees cover power production, not the physical assets involved in solar production. Most solar installers also offer equipment warranties of up to 25 years on parts like panels, inverters, and racking systems.

What is a solar panel performance warranty?

A solar panel performance warranty guarantees that a home solar panel installation will meet or exceed a baseline of electric power output over the panels' lifetime and warranty period.

What are the different types of solar warranty?

There are two main types of solar warranties: performance warranty and product warranty. A performance warranty is a guarantee that the total system output will not drop below a specified degradation percentage. A product warranty guarantees the solar panel's capability to produce energy, and it's also known as a lifespan warranty.

How long does a solar installation warranty last?

Installer performance guarantees can last between 5-10 years, and the specifics vary by company. Finally, if you go solar through a marketplace like solar.com, you may also be covered by another layer of warranties. For example, solar.com offers a TriGuard Guarantee. This marketplace warranty includes:

What does a solar installation warranty cover?

While manufacturer warranties primarily cover issues related to the solar panels themselves, such as material defects, workmanship defects, and loss of power output, the solar installation warranty extends additional protection to the entire photovoltaic system.

Which solar panel has the best warranty?

Comparisons should focus on product warranty terms, power guarantees, labor warranty terms, transferability and bankability, and the availability of an extended warranty. Based on our ranking system, Panasonic has the strongest overall warranty, with REC and Qcells close behind. Why are solar panel warranties important?
