

Sint Maarten is entirely fossil fuel-dependent for electricity ... suggest that renewable energy has high potential to displace fossil fuel generation, particularly using onshore wind, solar hot water ...

The DRE system could be of any type - solar, wind (or, even better, a wind-solar hybrid), or biomass or biofuel-based. Biofuel is a low-hanging fruit. India's agriculture sector generates huge amounts of biomass every year, which can be used directly as biofuel or processed to produce other biofuels such as ethanol, bio-CNG, and biogas.

A summary of Sint Maarten's solar markets In 2014, Sint Maarten's council of ministers sanctioned the National energy policy document. This document was supposed to usher in a new era of renewable energy in the Caribbean Island country. More specifically, the policy document envisioned an 80% renewable energy capacity by 2020. Unfortunately, none of the targets ...
