

Solar generator construction site

Should you use a solar generator for a construction site?

When it comes to temporary power for a construction site, you're probably used to connecting to a power grid or using gas-powered generators. However, there is an alternative, cleaner option: solar generators. There are many reasons you should consider using a solar generator for your next construction project.

Can a construction site be powered by solar?

Solar power can power most equipment at a construction site, making it a viable option to end dependence on traditional energy and fossil fuels. Solar power is one of the fastest-growing renewable energy resources in the United States.

Can solar power be used as temporary power for construction sites?

Solar power can be an effective solution for temporary power needs at a construction site. A solar power generator offers lower fossil fuel consumption because it doesn't require gasoline or diesel fuel to run and it removes the burden of connecting to the grid and using power boxes for your equipment.

Can a solar generator be installed in a trailer?

Yes, solar panels, inverters, and storage can all be installed in one trailer if you only need one solar generator for a construction site. Smaller solar generators are available for larger sites requiring multiple power connections. You can also arrange them in a trailer to take advantage of clearings and terrain to help generate power.

What is a portable solar generator?

Our portable solar generators are designed for easy transport and quick setup, providing reliable power wherever you need it. Perfect for remote locations, events, and job sites, these units offer a silent and eco-friendly alternative to traditional generators. Optimize your construction site operations with our cost-efficient solar generators.

What is a backup solar generator?

Backup solar generators provide backup power for when an electrical grid fails, providing an efficient alternative for installing a complete system. Backup solar generators provide enough power to turn on appliances such as refrigerators, washing machines, televisions, and more in the event of a blackout.

Solar generator rental based in Austin, Texas and serving the entire state of Texas and beyond. Texas Solar Trailers features solar generators on a dual axle trailer with these features: ...
