What is solar energy used for in the Netherlands?

In addition to photovoltaics, solar energy is used extensively for heating water, with 669.313 m<sup>2</sup> installed by the end of 2020. Generating a total of 326 GWh heat energy in 2020. Nearly 80% of solar power installed in the Netherlands in 2017 was for small systems of less than 10 kW, a large part being rooftop Solar PV.

What is the largest solar installation in the Netherlands?

2019 The largest solar installation in the Netherlands, the 103 MWp array in Groningen, becomes operational.  
2020 The Netherlands passed the 10,000 MWp of installed PV capacity, becoming the 10th country to pass the 10 GW barrier.

How can solar panels complement Dutch architecture?

The goal is not just to add solar panels but to integrate them in a way that complements the beauty of Dutch architecture. Depending on the roof's size, shape, and orientation, panels can be laid out in patterns that are both functional and aesthetically pleasing.

Can you install solar panels in a Dutch home?

Contemporary Dutch homes, with their expansive roofs and minimalist design, offer a wonderful canvas for solar installations. These homes often allow for a more extensive array of panels, maximizing energy capture. The goal is not just to add solar panels but to integrate them in a way that complements the beauty of Dutch architecture.

How do you care for a solar panel in a Dutch home?

As you embrace the allure of the sun's energy in your Dutch home, it's essential to remember that solar panels, like the beautiful tulip gardens of the Netherlands, require a touch of care to bloom to their full potential. Check for debris or obstructions on the panel surface. Ensure the system's peak performance and address issues.
