

How much does it cost to install solar panels in Cyprus?

The average price of installing solar panels has dramatically dropped over the last decade to almost 90%, allowing more people to afford such an investment. In Cyprus, it is estimated that it takes about 1.5 to 4 for the investment to pay off. The final price heavily depends on the specifications of your project and your needs.

Can a non-residential solar system be installed in Cyprus?

Residents of Cyprus who haven't installed any other PV systems with any other Government Grant Scheme are entitled to apply for a non-residential solar panel project, and the panels can be installed either on the roof of the applicant's premises or on the ground. The contract between the producer and the EAC lasts 10 years.

Do solar panels produce electricity in Cyprus?

Solar panels absorb solar energy only on sunny days when most of the day sun shines. This means that they don't produce almost any electricity on cloudy and rainy days. Fortunately, Cyprus is blessed with over 300 sunny days a year, so this isn't something to worry about.

Who can apply for a solar panel project in Cyprus?

Any homeowner who has been living in Cyprus for at least six consecutive months and who are listed in the tariff code can apply for a household solar panel project. The net-metering contract between a homeowner and the EAC typically lasts 15 years and it is extended in accordance with the pertinent laws in effect at the time.

Should you invest in solar panels in Paphos?

All done by simply investing in solar panels in Paphos. The initial investment costs seem to off-put many, but installing solar panels is a long-term investment that is going to pay off for the years to come. You can also apply for subsidy programs that can reduce this cost significantly.
