The law includes a solar obligation, which requires newly built sports clubs, hospitals and hotels to install a solar water heating system - so far, without technical requirements. From now on, there will be a Responsible Registered Technician, RTI, who is to design the installation and register it on MIEM's website.

PERFORMANCE COMPARISON OF DIFFERENT WATER HEATER SYSTEMS WITH & WITHOUT SOLAR CONTRIBUTION, IN URUGUAY 1. Summary Uruguay is promoting a change in the energy matrix betting on the use of renewable energies. The energy consumption for hot water is mainly electrical, representing approximately 30% of electricity consumption of

Los calentadores solares son una solución eficiente y sostenible para el suministro de agua caliente en diversos sectores en Uruguay. Utilizan la energía del sol para calentar el agua, reduciendo significativamente los costos energéticos y las emisiones de carbono.

Uruguay's solar thermal market is growing slowly, but it is growing - thanks to a residential subsidy scheme and a government decree. The scheme, which started in March 2012, has so far subsidised a solar water heater in almost 1,000 households with between 40 and 70% of the investment costs.

Overall, Uruguay has the most water heaters (91 %), followed by Chile (86 %), Brazil (75 %), Colombia (70 %), Barbados (48 %) and Mexico (47 %). Latin America contributes 2.5 % to solar thermal sales globally.
