

# Solar off-grid power station cost

How much does an off-grid solar system cost?

Placing an exact cost to an off-grid solar system is difficult given the range of options open to you. As an average, a complete off grid power system for a three bedroom family home would cost between ₹15,000 and ₹28,000 including fitting. A smaller 2.2kw option as described above could cost around ₹12,000. Prices correct as of September 2019.

How much does an on-grid solar system cost?

On-grid systems are built to support energy needs but do not serve as your only electricity source. This means they're smaller and cost less than off-grid options. The average cost of solar panels for an on-grid, 5 kilowatt-hour (kWh) system is \$15,000-\$20,000. An off-grid system costs more than twice as much.

How much does an off-grid energy system cost?

We recommend including an alternate energy source to support your home during extended periods without direct sunlight. The average off-grid system costs around \$55,000, but this price varies based on system size, type, and additional components.

What is an off-grid Solar System?

Partially off-grid solar systems include the same equipment as fully off-grid systems but also include the equipment necessary to integrate with mains electricity. Each off-grid system includes everything required to install, generate, store and deliver energy from renewable sources. We can design and install your system for you too!

Does an off-grid solar system work with a large home?

Yes, off-grid systems work with any residential home, even larger ones. Off-grid systems work best for remote homes or those with limited access to utility power. Due to their size and power capacity, off-grid systems are more expensive than grid-tied solar systems.

What is an off-grid power system?

Most modern Off Grid Power Systems are designed using 'AC Coupling' which enable all of your home's energy requirements to be provided directly from the solar array during the day, unlike traditional 'DC Coupled' systems which must provide ALL their power from the battery storage system.

**Solar Power Costs:** As of 2024, the cost of solar power in India ranges from INR 2.5 to INR 3 per kWh. This cost includes the initial capital expenditure spread over the lifetime of the solar panels, which typically last 25-30 years. ...
