There are many ways solar companies share the price of solar panels. The three most popular include: Gross cost; Price per watt; Price per panel; In our expert opinion, the most effective and accurate method for pricing solar panels is the gross cost. Let's explain why and then discuss each pricing model in detail.

Today's premium monocrystalline solar panels typically cost between \$1 and \$1.50 per Watt, putting the price of a single 400-watt solar panel between \$400 and \$600, depending on how you buy it. Less efficient polycrystalline panels are typically cheaper at \$0.75 per watt, putting the price of a 400-watt panel at \$300.

Solar panel for house price in Paraguay

Average System Cost. The average cost of a residential solar panel system ranges from \$18,000 to \$43,000, depending on the system size, location, and available incentives.. Typically, a 6-8 kW system--suitable for an average 2,000-square-foot home--will cost between \$15,000 and \$22,500 before applying any incentives.
