

Solar panel for roof Heard and McDonald Islands

Does McDonald's have solar panels?

At a new McDonald's restaurant that just opened at Walt Disney World Resort in Florida (with COVID-19 protection measures in place), solar panels covering the roof--and solar glass panels throughout the building--are designed to generate enough energy that the restaurant can run on 100% renewable power.

How does a solar-powered restaurant work?

By shrinking energy use dramatically, the design makes it possible to power the entire 8,024 square-foot restaurant with only the solar panels on the roof, along with solar technology embedded in glass that provides shade over the outdoor eating area.

Which solar panel clamps do I Need?

SolarRoof(TM) has suitable mid and end clamps for every size of solar panel including frameless, thin film panels or special clamps for cyclonic regions. In the growing range of clamps, cable clips, adapters and accessories you're sure to find genuine parts you require for your residential solar rooftop mounting needs.
