

Solar panels for roof of house Palestine

What is IFC's rooftop solar energy facility in Gaza?

The Palestine Real Estate Investment Co's (PRICO) rooftop solar energy facility is IFC's first large-scale solar energy installation in Gaza and is supported by the IFC-Canada Climate Change Program.

What is the largest solar installation in Gaza?

PRICO is the largest solar installation in Gaza and the first one for which an ad-hoc grid integration solution has been developed with the grid operator to ensure power evacuation and 24/7 continuity of supply. This is a standard-setting benchmark that is replicable and scalable in other locations.

How did IFC finance the PRICO solar project?

In 2018, IFC structured an innovative debt financing package for the PRICO Solar project to promote the installation of solar panels on the rooftops of several buildings belonging to the Gaza Industrial Estate, Gaza's largest business park.

The cost of solar panels ranges anywhere from \$8,500 to \$30,500, with the average 6kW solar system falling around \$12,700. It's important to note that these prices are before incentives and tax ...

A recent study found that solar panels are viewed as upgrades, just like a renovated kitchen or a finished basement, and home buyers across the country have been willing to pay a premium of about \$15,000 for a home with an average-sized solar array. Additionally, there is evidence homes with solar panels sell faster than those without.

On an environmental level, the solar energy systems will substantially reduce the environmental pollution created by the facilities, due to the reduced use of generators.. The facilities report an impressive 46% reduction in their average monthly electricity expenses. Prior to the installation of the solar panels, the facilities collectively typically paid \$13,205 each month for electricity ...
