We would expect a 6kW solar system in Home Island Cocos (keeling) Islands to produce 26.40kWhs of solar energy over the course of a year. How much this is actually worth depends on how much you pay for power and how much solar power you send to the grid. A 6kW solar power system is shown here - commonly 17 x 370W panels are used to get to 6.3kW.

We want solar panels on as many new homes as possible." It is worth noting that no plans have been announced to weaken the Future Homes Standard in its current form. What the industry criticised, and what the ministry did not acknowledge, is the absence of an obligation for new builds to include solar systems.
