Why are my solar panels cloudy and hazy?

But we often found that over time the solar panels on top of the solar lights will become cloudy, hazy. that only a small amount of light gets to them anymore, the lack of light being able to be collected by the solar panel has greatly diminished.

Why do solar lights turn yellow?

Yellowing is caused by years of exposure to the sun. The plastic on solar lights can yellow anywhere from one year to three depending on how much time they spend in direct sunlight vs under a covered area etc. It's not harmful, but it certainly isn't attractive! What causes some types of solar light bulbs to turn more quickly than others?

What does solar panel discoloration look like?

Solar panel discoloration is very noticeable, with the formerly white portions across the surface of the cell turning into a yellow or brown color, and it tends to happen just a few years after installation.

Why are my solar lights not working?

If your solar lights aren't illuminating as brightly as they used to, clouded plastic over the solar cell is the most likely culprit. Wipe the plastic off with a damp cloth to see if the plastic is cloudy or just dirty. A coat of lacquer or nail polish helps make the cloudy plastic clear again.

What happens if a solar panel is dirty?

A dirty solar panel can reduce the amount of energy that it can absorb, which can result in dimmer lights or shorter working hours. Here are some steps to clean your solar panel: Turn off the solar light before cleaning the panel to avoid any electrical hazards. Use a soft cloth or sponge to wipe the surface of the solar panel gently.
