

Solar pillar lights do not generate electricity

Are solar pillar lights worth it?

There are no electricity costs and a tangle of cables is a thing of the past. Solar-powered pillar lights generally come with a ground spike, hence they are flexible. They can be easily moved to a different location. They are perfect for design fans.

What are solar powered pillar lights?

Solar-powered pillar lights generally come with a ground spike, hence they are flexible. They can be easily moved to a different location. They are perfect for design fans. Tip: solar-powered pillar lights are best positioned where they can soak up a lot of sunshine during the day. Otherwise the battery won't charge fully.

Do solar panels generate electricity?

That said, the rate at which solar panels generate electricity varies depending on the amount of direct sunlight and the quality, size, number and location of panels in use. Even in winter, solar panel technology is still effective; at one point in February 2022, solar was providing more than 20% of the UK's electricity.¹

Do Pillar lights need a motion detector?

A pillar light fitted with a motion detector is even more practical: the light only shines when it is needed. And it turns itself off again after a certain period of time - ergo, you save electricity. And you protect the battery within your solar light. Motion detectors also make your garden safer and more secure.

Do solar panels need direct sunlight?

No. Solar panels don't need direct sunlight to harness energy from sun, they just require some level of daylight in order to generate electricity. That said, the rate at which solar panels generate electricity varies depending on the amount of direct sunlight and the quality, size, number and location of panels in use.

Can you use pillar lights outside?

You can also get pillar lights made of aluminium and other metals, which are suitable for use outside. In order to ensure that the bulb is well-protected but can still shine brightly, glass or plastic lampshades are a good option. All you need to do now is make your choice and get started with outdoor lighting.
