

# Solar power generation Lego creation

Does Lego have a solar power plant?

The Lego Group already makes solar-themed kits with its iconic bricks, but this time it's for real: the new factory will sport an on-site solar power plant big enough to match its entire electricity demand. Solar Power Vs. Wind Power On The Atlantic Coast

Is Lego doing its solar energy homework?

Evidently Lego has been doing its solar energy homework. Last year the company's fan-friendly new product incubator featured an expandable solar energy array complete with beehives, pollinator habitat, and grazing sheep, all of which are elements in the overlapping fields of regenerative agriculture with agrivoltaics.

Will Lego make a sustainable solar house?

LEGO is one of the first building blocks of a child's imagination, and one of the final frontiers to save them from their screens. Even the smallest pieces can build the future...one brick at a time. If 10,000 people vote for this idea, "The Sustainable Solar House," LEGO will consider making it a real kit.

Did solar power lure Lego to Virginia?

Solar power helped lure Lego to the state of Virginia, where it plans to build its first ever US factory complete with an on-site PV array.

Why is Lego launching a solar park in Virginia?

The new Lego announcement provides the PV industry in Virginia with a high profile example of the power of renewables to attract new business. "The location in Virginia allows us to build a solar park which supports our sustainability ambitions and provides easy links to country-wide transportation networks.

When will Lego Build a new factory in Virginia?

Construction will commence in fall 2022 with production projected to start in the second half of 2025. A temporary packaging site will open in an existing building nearby in early 2024 and create up to 500 jobs. The Virginia factory will be the LEGO Group's seventh factory globally and the second in the Americas.
